

4º CONGRESO
LATINOAMERICANO
DE ESTRUCTURAS
DE MADERAS

Dr. Eric Karsh (Canadá)

Eric Karsh is a founding partner of Equilibrium Consulting, a structural engineering firm recognized internationally as a leader in the field of timber engineering.

In 2012, Eric co-authored “The Case for Tall Wood” study with architect Michael Green. The study and Michael Green’s TED Talk in 2013 helped raise tall wood construction to international attention and was featured by high profile media including CNN, the Economist, the Fifth Estate and National Geographic to name a few.

Eric’s projects include the award-winning UBC Earth Sciences Building in Vancouver and the Wood Innovation and Design Centre in Prince George, BC. Eric is currently working on the design of Tall Wood projects in Canada, the US, France and Brazil.

In 2018, Equilibrium Consulting becomes a Katerra company, leveraging the firm’s 20 years of innovative timber design experience and opening exciting new opportunities for design, research and development in mass timber construction.
